

**Digigraph Principles and Aurum Verses  
Side-by-Side: Core 2000**

**Copyright 2015 By Dr. Michael J. Bisconti**

## ***Preface***

This document provides the *primary aurum verse sources* for the *core 2000 digigraph principles*. The core 2000 digigraph principles are *the minimum number of digigraph principles necessary to thoroughly validate a text as the Word of God*. The number was established through decades of experience applying the digigraph principles to the ancient manuscripts.

Note that we always, initially, apply 10,000 principles to every manuscript and, subsequently, before officially validating an ancient manuscript, the full set of 215,556 digigraph principles.

The extra digigraph principles provide a “*proof buffer*” for the Word of God. That is, there are always those who challenge the truth. In order for our conclusions to not be in limbo, in the minds of some, while the challenge is being met, we provide a “buffer of extra proof.” In our experience, in the worst case scenario, a challenge can go on for a year. During that year, we do not want there to be any doubt as to the validity and authority of the biblical text; hence, the buffer of extra proof.
